February 25, 2004

Dear sirs;

We are suppliers of prescription and other medications from Canada to our friends and neighbors in the United States as explained in the enclosed brochure.

We are actively seeking representatives throughout the United States, who are interested in supplementing their personal income while at the same time helping their existing and future customers to garner substantial savings on their medication requirements. We are offering attractive commission packages in return for simply introducing your existing clients to our program and perhaps facilitating their enrollment.

We will supply you with brochures and other promotional materials, current price lists, and patient forms packages. We also have PowerPoint presentations available that can be customized for your exclusive use for presentation to individuals or small groups. You can likely identify during your normal course of business, any clients that would benefit from our program, and introduce them to our services. Your commission would be based on all orders, including future repeat orders, placed by your clients either through you or directly with us.

Please take a few moments to explore our web site at [www.medsviacanada.com](http://www.medsviacanada.com) to get additional details about our program, and please compare our prices to American prices to fully realize the benefits we can offer your clients. I am also available during normal business hours should you have any other questions or concerns.

We do not require you to pay any fees whatsoever to get started or on an ongoing basis, and you do not have to expend funds for materials or supplies, which will come from us. Obviously, this is a "no-lose" situation which could offer substantial rewards with minimal effort. Please call me if you wish to proceed.

Sincerely,

Al Kula, B.Sc.Pharm., FACA, FACVP  
Director of Pharmaceutical Services
